The above number represents the circulation, each week of the DAILY and WEEKLY BULLETIN. Advertisers are invited to call and secure themselves of the truth of the statement, and they are requested to bear in mind that our rates for advertising are the lowest.

EXECUTIVE interference in the conduct of the campaign is charged against Governor Cleveland, of New York, and dissatisfaction is arising among the Democracy.

The storm on Lake Erie has abated. Seventeen lives were saved at Cleveland by the Life Saving crew, who fired a line from a howitzer across the disabled vessels, and ran baskets back and forth along the ropes.

KENTUCKY'S bonded debt amounts to only \$180,000, and there is \$268,605 in cash lying in the treasury. There are \$1,698,605 in school bonds which are unredeemed, and are not considered as a part of the debt of the State.

Hundreds of letters from those using Ayer's Hair Vigor attest its value as a restorer of gray hair to its natural color. As a stimulant and tonic, preventing and often curing baldness, and cleansing and soothing the scalp, its use cannot be too strongly recommended.

It has come to the knowledge of the Internal Revenue Bureau in Washington that cigar makers all over the country are placing false brands on their boxes in order to give their wares a fictitious value. The law provides that the box shall be branded with the name of the factory, the district and the State, but many cigars of ordinary and common material and manufacture are put into boxes labeled Key West, or with some noted Cuban mark. The bureau has advised collectors of internal revenue that this practice must be discontinued by manufacturers, as the goods thus falsely labeled will be confiscated. Of course there are no Maysville manufacturers included in the list above referred to.

It is pretty nearly time that the Government makes the subsidy railroads pay up their indebtedness. They owe the United States, in the shape of principal and interest, \$123,843,605. Against this there are credits of various bonds amounting to \$21,469,292, leaving a balance in favor of the United States of \$102,374,313. In view of this indebtedness United States Commissioner Armstrong puts forward the suggestion of a Federal railroad commission as the first step toward regulating inter-state commerce upon a constitutional basis. In its present mood the public is prepared to accept with eagerness, any proposition which will effectually check the railroad domination with which the political and business interests of the country are now threatened.

THE Importers and Traders' National Bank of New York City has taken an important step to protect itself against the large amounts of comparative worthless mercantile paper which the recent failures have shown to be in existence. Whenever paper is offered to this bank for purchase it addresses a series of questions to makers, asking them to state the amount of their bills payable, amount of mortgage and other liabilities. They also ask information as to the value of merchandise on hand, amount of good bills and accounts receivable, cash on hand, value of real estate and other assets, and similar information by which the bank can judge of the solvency of the makers. The plan has been found to work well, and, while some over-sensitive parties have protested, it will probably be adopted by other banks.

THE following is from the Chicago Journal: "Dr. Walker, President of the Boston Institute of Technology, will have the country much beholden to him if he continues the good work he has so admirably begun of leading youths into useful and practical channels of study. He finds the tendency of the young is toward a professional calling, and as his elder experience proves these vocations to be dangerously overcrowded, he is striving to correct the fanciful disposition to a common-sense regard of the demands of life. He is inducing many of the boys of that city to pursue mechanics as a study, and is by that means fitting them for paths in life that are not already choked up with futile toilers after fame and fortune. The fact is, this country needs more industrial institutions and fewer colleges of law and medicine. We want more common sense and less idealism, more hard-headed practice and less theory, more workers and fewer puddlers. Success in the workshop is infinitely preferable to and more honorable than failure in a profession, and the mere matter of name has come to make but little difference with the estimate of men's worth nowadays. Technical education is what is wanted in our manufactories, and in them is our life."

CONDENSED NEWS.
